Ladies' Aid Lunch and Concert Proved to be a Very Pleasant Event

The Ladies' Aid concert and lunch, held on Wednesday evening in the School Hall was a great success in every respect. Rev. Mr. Wollett acted as chairman. The programme did not begin in the usual manner, with the chairman's address; however, Mr. Wollett gave his address later in the evening.

The first number on the program was a negro chorus given by six men of the town. Fortunately they were not born negroes but they played their part so well, that they passed. Those who accompanied them were Mt Youell, piano, T. Norden, saxophone, and G. Agar, banjo; F. V. Howard A. L. C. M., of Youngstown, gave two very fine piano solos. Selection by Orchestra. Solo, Norman Jacques. Saxophone, T. Norden. "The Wedding of the Painted Doll" was well worth special mention, the costumes were perfect and great credit is due to Mrs. W. A. Hurley, who must have spent many days making them. It is to be hoped that "The Painted Doll" on some future date, will be put on again. Duetto, by Florence Connell and Urdine Brownell, accompanied by Marjorie Lee. Trio, Wilma Hurley, violin, T. Norden Saxophone, Mr Youell, piano Chorus by four boys. Mrs. A. E. Roberts gave two very fine solos. "Camp Fire" by the C. G. I. T. girls. Men's chorus, "Close" with "God Save the King". \$65.00 was taken proceeds.

SCHOOL REPORT

The following is the report of the examinations for October for the Public School grades. No results for grades I and II, also grades IX, X and XI will be published after Christmas:

Chinook Veterans and Ladies Enjoy Banquet And Dance at Cereal

The Great War veterans of this community and their lady friends attended the Armistice Day celebration at Cereal on Monday evening and enjoyed themselves immensely.

This was the annual Armistice Day event along this section of the C.N.R. and held at a different place yearly. Formerly it has been a stag affair, but this year the ladies were invited.

The affair was held in Community Hall. The banquet, served by the Cereal W.I., was very appetizing. Then followed a program addresses, etc. Ed. B. Hughes, of Cereal, was the toastmaster and the following toasts were proposed and responded to: "The King", "The Allies", "The Army", "The Navy", "The Air Force" and "The Ladies". C. W. Rideout had the honor of proposing the toast to "The Allies". Mrs. Mack Collier, of Cereal, entertained in a very pleasing manner with three solos. Following the banquet and program dancing was enjoyed. Those from Chinook attending were Major Rideout and Mrs. Rideout, Walter Anderson and Mrs. Anderson, S. W. Warren and Mrs. Warren, Miss Agnes Ingles, Robt. Morrison, D. E. Followay, Larry Connor, Harry Forbes, Jim Wilkinson, Jack Gray, Ben Gray, Scotty White, I. Waters.

The Problem of Narcotics

The evil of narcotics is one that strikes both directly and indirectly at the home.

There are about 8,000 drug addicts, or dope fiends, as they are more commonly called, in Canada. They consume, and here is an even more startling figure, about \$80,000 worth of drugs every day.

The danger from the widespread use of narcotics in Canada, is that drug addicts breed drug addicts; each one is an agency of evil who will try to pull other victims into the mire in which he finds himself.

The four main drugs that have assailed Canada are opium, morphine, cocaine and heroin. Opium is the juice of the white poppy, cultivated mainly in Hindustan and Asiatic Turkey, and thickened by evaporation.

Opium would not be so important to us, but for the fact that other drugs that are used most extensively in Canada, come from opium.

About one hundred and twenty-five years ago, a French chemist found that he could produce another drug, morphine, which was named after the god of sleep, Morpheus, from opium.

Sixty-five years later another chemist, this one an Austrian, found by experimenting with cocoa leaves that he could produce cocaine.

Just thirty years ago, a German chemist found he could take from opium still another drug, which was called heroin. It is three or four times stronger than morphine, and is blamed largely for the increase in drug usage on this continent since the war. At first heroin was not believed to be habit-forming, and was used on that assumption. But two years after its discovery, it was found to be as bad, if not worse, in getting a grip on its victim. It has been renounced by the medical profession as not at all necessary for their purpose. But it continues in use throughout the world, a dangerous drug, without any redeeming feature or excuse for its existence.

All these three drugs, morphine, cocaine and heroin, are white powders, bitter to the taste and soluble in water. All are deleterious, both mentally and physically. The habitual use of any of them will bring death with inexorable certainty. Opium is the slowest to kill, morphine, the next, while heroin is the most rapid of all.

For example, to compare the drug habit with the liquor habit; five ounces of alcohol is considered a fatal dose. Five ounces of morphine taken at one time will kill fifteen hundred men.

Chemistry has given us these drugs, and passed them on to the medical profession. The doctors used them, with the exception of heroin, to assuage pain. But mankind was not satisfied with that, and the use of these drugs spread to people who did not need them. Now the combined wisdom of chemistry, medicine, and governments, is not sufficient to strike down the peril.

There are fantastic stories at times of people who have become drug addicts because they were given one of these drugs in a time of need, and that one administration made them addicts. These are very rare cases, and hardly need to be taken into consideration. The use of drugs is spread about almost entirely by people who profit greatly by creating other addicts.

Thousands of tons of poisonous drugs are consumed every year by the human race. Less than one per cent. of the total consumption is necessary for medicinal purposes.

Before heroin came into general use, adults were, in the main, the only addicts. The dealers in heroin, however, recruit among their customers young children. The average age of the heroin addict is about 22 years of age, which means that he must have become addicted some years before he was twenty.

Again to compare the drug habit with the liquor habit: It takes some time of regular drinking before a youth becomes a regular drunkard. Not so with heroin. An ounce of heroin can make two thousand addicts within a week. As well as that, a drunkard sometimes serves as a useful example with which to point the warning finger. In fact a drunkard is a general rule, will advise others to keep away from the stimulant that caused his downfall. Not so the heroin addict. He begins right away to drag others into the net. He is used as a recruiting agent for the operators who are making the money. The more heroin he gets, the more he craves. He is told that in order to get more of it, he must introduce more customers. And so the peril spreads.

Airing a Grievance

Getting Irritation Out Of Your System Makes You Feel Better. There is wisdom in letting people talk out their grievances. There is no other way to get rid of them. That is the reason why democracy thrives through free speech. If people have a grievance, let them talk it out. If they have a grouse, let them express it. Repression makes inner ugliness to become a poison. If you are wise, you will never seek to keep a man from expressing his irritations at his fellow men. Moreover, if you are really wise, you will understand how to deal with people who have a grievance. Let them get it out and they will have an opportunity to deal with their hearts after their emotions have had opportunity to express themselves.

Protection For Miners

Companies Supplying Men With "Tin" Hats Free Of Charge. The "tin" hat of war days has found its peace time career in serving as protective headgear for miners. D. G. Sinclair, chief inspector of the Ontario Department of Mines, who has advocated the use of the helmets by miners, has reported that many lives have been saved recently by them. Several mining companies are supplying miners with the "iron derbies" free of charge.

Chewing gum is exported from the United States to more than 75 countries.

Having taken out his pilot's certificate, the Prince of Wales is an ace before he becomes a king.

Fighting Forest Fires At Night

Miner's Carbide Lamp Used By Rangers In Work Of Extinguishing Fires

Equipment is now in use by the Forest Service, Department of the Interior, which enables rangers to fight forest fires at night, when such work is most valuable, owing to the fires dying down at dark. The chief item of special equipment is the miner's carbide lamp, which is attached to the fire-fighter's cap and so is located just above his forehead. This leaves his hands free to work, and gives the light just where desired, both for travel in reaching the fire and for the work of extinguishing the fire.

WOMEN WHO SUFFER

Anaemia Responsible For Most Of The Ills Of Girls and Women

Medical science shows that most of the ills that afflict growing girls and women are due to the fact that the blood is either poor in quality or deficient in quantity. This anaemia is the cause of all ailments, such as the poor appetite, breathlessness, and the aching backs that make life a burden for so many women. There is no need for any woman to suffer in this way, for all the miseries of anaemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills create an abundance of new rich blood—their wonderful reputation is based on that.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. One of these is Mrs. Napoleon Gallant Tignish, F.R.I., who says: "I am among those who can strongly recommend Dr. Williams' Pink Pills. Before I began using them I was in an extremely nervous condition. I could not sleep, neither could I eat, and was constantly growing weaker. I got medicine from a doctor, but it did not seem to meet my condition, and then, on the recommendation of a friend, I began to take Dr. Williams' Pink Pills. By the time I had taken a couple of boxes there was no doubt my condition was helping me. I continued to use until I had taken six or seven boxes when I was again in the best of health. I can always keep Dr. Williams' Pink Pills in the house, and if any member of the family feels run-down the pills soon put them in good condition."

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sooner you do so the sooner you will regain your old-time energy. You can get these pills through any local dealer or by mail postpaid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Power Of Sound Waves

If Highly Pitched They Will Do Much Damage

Living creatures can be struck dead by sound waves too highly pitched for the human ear to hear them, writes T. C. Bridges. These high frequency waves—called super-sonic—have been tried on animals and produced instant death. The sound appears to shatter the blood corpuscles, and death is as sure and sudden as lightning. Sound can do many things which seem mysterious and almost miraculous. For instance, fire can be extinguished by sound. Some little time ago Mr. Charles Kellogg, of California, gave a demonstration of the power of sound over flame, and by drawing a violin bow across a burning of aluminium extinguished a burning gas jet at fifty feet. Sound vibrations can not only break a wine-glass but can damage a building. It is suspected that the deep, vibrating notes of organs can cause vibrations which may actually weaken the structure of a church or cathedral. The very latest word of sound is to make an aeroplane light up the acrobats at which it is arriving merely by a note of its siren. This was done recently at Newark, New Jersey.

Preserving Old Windmills

Germany is preserving its old windmills because of their historic value and their picturesque touch to the scenery. To raise funds for their preservation many of the windmills have been fitted up as rest houses, where young people on walking tours can get a night's lodging at a low rate.

Electricity is exported from Canada only by license granted by the Electricity and Gas Regulation Service of the Department of Trade and Commerce, and the same branch of the department has jurisdiction over the export duty which has been imposed since April 1, 1925.

The favorite pet of the poet Burns was a sheep, while Rosseti leaned toward woodchucks, wombats, armadillos, kangaroos and camels.

Canada's Economic Conditions

Confidence Is Felt By Big Financial Men In The Future Of The Dominion

In the face of the serious decline in prices of stocks, Premier Mackenzie King recently made a brief statement in newspapers in which he declared that economic conditions in Canada had never been sounder, nor faith in the development of the Dominion greater, if one was to judge by those indices used by the large financial and insurance companies. The hectic conditions which had prevailed recently might have an adverse effect on Canadian stocks, but Mr. King said that the confidence shown by foreign investors should in itself be a factor in inspiring confidence in the Dominion and its future.

It was at times like these, said Mr. King, that one realized the importance of stability in laws and general soundness of business in a country. Canada's position was secure, he thought, and he pointed to the growth all along the line of primary and secondary industries in the country. The fact that capital for investment was so freely offered in Canada showed the confidence that was felt in the future of the Dominion.

To Honor Pioneer

Premier Tolmie, Of British Columbia, To Be Present At Celebration Of Mount Rainer's Discovery

Nearly 100 years ago Dr. William Fraser Tolmie, physician of the Hudson's Bay Company, at Fort Vancouver, Washington, trudged up the Puget Sound River to Mount Rainer, the first white man to reach a peak now known as a scenic resort. In 1933, the centenary of this expedition, Dr. Tolmie's son, premier of British Columbia, will be the guest of honor at a celebration of Mount Rainer's discovery.

The premier has accepted the invitation of the Rainer National Park advisory board to take the leading part in the ceremony a little over three years hence.

FAINT, DIZZY SPELLS

Had To Sleep Propped Up In Bed

Mrs. Norman Bishop, Salisbury, N.B., writes: "I was troubled with faint and dizzy spells and when I would lie down I would suffer terribly with smothering spells. I got so bad I had to sleep propped up in bed. My doctor said it was my heart and nerves, and that I needed a good heart tonic."

"I was advised to take MILBURN'S HEART AND NERVE PILLS."

and I had not taken one box when I could lie down and sleep like a child." Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Irate Passenger (as train is moving off): "Why the—didn't you put my luggage in as I told you, you old fool?" Porter: "Eh—h, man, yer baggage is na sic a rule as yerse! Ye're in the wrong train."

Joint Branch-Line Programme Announced

Thornton and Beatty Publish Plans For Alberta Railways

Announcement has been made jointly by Sir Henry Thornton and E. W. Beatty, of the branch line programme to be commenced in 1930 by the Northern Alberta railways. The presidents of the two transcontinental systems, which jointly own the Alberta railways, point out that under the agreement for acquisition the purchasers undertook to build within five years sixty miles of branch lines, in addition to the branches under construction by the government of Alberta at the time the purchase was made.

To meet the traffic needs of the district, and in fulfillment of statements previously made by the directors of the Northern Alberta railways have, therefore, decided to recommend to the government and to the directors of the Canadian Pacific, the commencement in 1930 of a line from Hythe to Rolla, a distance of fifty miles, and from Fairview westward, a distance of 15 miles. In addition, the Northern Alberta railways will, during the coming year, undertake to investigate the traffic possibilities of an extension west from Spirit River and from a point at or near Grimshaw, to serve the Battle River district in which considerable settlement has taken place.

The programme announced is of considerable magnitude and confirms the statement already issued that in the opinion of the Canadian National and Canadian Pacific companies, the most important and immediate work in the development of the Peace River area is the construction of branch line mileage.

A Remarkable Tree

White Pine Tree In Ontario Yields 17 Cords Of Wood

Remarkable in size, symmetry and the soundness of its wood, a white pine tree which has been lying 40 or 50 years or more on the farm of Norman Reid on Coughane Lake, in the North Bay (Ont.) district, was utilized recently for wood.

It yielded 17 cords. The pine measured 145 feet from the tip to the base, which showed a diameter of five feet, 10 inches. Twenty feet higher up the diameter was but six inches less. The first branch was three feet through and the second two feet six inches. The stump bears evidence that the tree was felled either completely or partially, possibly half a century ago, remaining in a wonderful state of preservation through the changing seasons.

Meeting Of Two Seas

Uniting Of Mediterranean and Red Sea Foretold By Jules Verne

August last witnessed the diamond jubilee of the opening of the Suez Canal. In 1869 the waters of the Mediterranean and the Red Sea met and mingled for the first time, although the canal was not opened for traffic until November. It is interesting to remember that Jules Verne imagined an underground tunnel uniting the two seas, running under the isthmus, and that he makes Captain Nemo take his under-sea craft—the prototype of the submarine—right through it.

Didn't Interest Him

An actor, who, because of his wandering profession had seldom paid his income tax, was at last discovered by the authorities, who promptly sent him a return to complete.

The actor kept it for a few days and sent it back with a little note: "Thank you very much, but I don't wish to join this affair."

Experiments show that an expert violinist can make 600 separate movements with his fingers during a single day's playing.

Canadian Fliers Organize

First Convention Of Its Kind Held At Fort William

With nearly 20 delegates from coast to coast in attendance, the first all-Canada aviation convention was held recently at Fort William. J. A. Sully, president of the Winnipeg Flying Club, was chosen chairman of the initial meeting.

The first business of the convention was the organization of a central body of the flying clubs throughout the Dominion, to be known officially as the "Canadian Flying Club Association." This association will be official spokesman of the various clubs throughout the Dominion, and will attempt to solve many of the problems which today face aviators from the Atlantic to the Pacific.

Delegates from the several clubs will be known as the board of governors and this body annually will choose a president, five vice-presidents, one honorary secretary and an honorary treasurer. The vice-presidents will be regional officers, from the following districts:

British Columbia, Alberta and Saskatchewan, Manitoba and Thunder Bay district, Ontario east of Thunder Bay and Quebec and the Maritimes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Reason Prince Sold Hunters

When the Prince of Wales abandoned fox hunting and sold his horses this year, he did so not for his own personal safety, as was generally believed, but because the prohibition of fox hunting was about to come before Parliament and the heir to the throne must not become involved in any political issue.

It is an old custom in Derbyshire, England, to decorate beehives just before a wedding.

It is estimated that 15,000 public speeches are made every day of the week throughout the year.

A man's credit is getting pretty low when he can't even borrow trouble.

Christie's Biscuits The Standard of Quality Since 1853

When Pain Comes

What many people call indigestion very often means excess acidity of the stomach. The stomach nerves have been over-stimulated, and food rots. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

League of Nations Society Accomplishing Good Work, But Handicapped By Lack of Funds

With the visit of Rt. Hon. Ramsay MacDonald to the United States and Canada, and the momentous decisions which will result from that visit public attention has been concentrated on the subject of world peace.

In considering this subject much credit is given to the League of Nations, in Geneva, and the great work it is doing. This is only right and the more the ideals of the League are brought before the public, the more likely is it that still further practical results will follow its efforts. But in Canada and elsewhere it is only fair that some credit should come to the home societies which are actively propagating League ideals in their several countries.

In Canada there has existed for some nine years an organization well and favorably known as the League of Nations Society of Canada. Handicapped by lack of funds, by comparative public indifference and an inadequate staff, it has continuously attempted to be an influence for good in all parts of the country and to zealously battle for the ideals for which it was founded.

Through the co-operation of the press of Canada, whose leading executives recognize the importance of its campaign, some publicity has been given to the yearly effort of this organization to increase its membership, and that work is being carried out with praiseworthy diligence.

It is not too much to say that such an organization would be a fit subject for a perpetual endowment which would relieve it of the necessity of canvassing for the comparatively small sum which it requires to carry on its immensely valuable work.—The Frederickton Daily Mail.

Canada's New Northwest

John M. Imrie Tells Easterners Of Development In The West

Speaking at a joint dinner of the Canadian and Rotary clubs at Sherbrooke, Que., John M. Imrie, managing editor of the Edmonton Journal, described what he calls "Canada's New Northwest," and told of the active progress of that section of the Dominion, stretching northwest of Lake Superior, and basic causes of the new movement—the lure of mineral wealth as well as agricultural and forest development.

"It has to do with new discoveries of oil and gas," said Mr. Imrie, "with new trade routes and new foreign markets, and with economic changes that are making for decentralization of industry."

Had Tried It

One morning while the children were eating breakfast Milford put two heaping spoonfuls of sugar in his cocoa.

"I should think one spoonful would be enough," objected his sister. "I should think so, too," he replied, "but it ain't."

Anguished Diner: "Waiter, call the manager! There's a beetle in the soup!"

Waiter: "It's no use sending for him, sir; he's scared to death of them!"

"Think twice before you speak and you'll have twice as much not to regret."

"Leon, before I marry you, I must confess that I have a glass eye."
"That is nothing. Only one more window to clean."—Moustique, Charlerol.

W. N. U. 151

Imperial Farmers' Union

Federation To Encourage the Consumption of Empire Products

The National Farmers' Union of Scotland have prepared the formation of an Imperial Farmers' Union or Federation to encourage the consumption of Empire products, to eliminate competition between different parts of the Empire, to stabilize quantities and prices, to control surplus and other similar schemes.

As this was in line with the policy of the United Farmers' of Canada, Saskatchewan section, the matter was taken up by the executive of the organization at Saskatoon and the following resolution passed: "That in the opinion of the executive such affiliation could be made if we had a national organization in Canada or a co-ordinating agency, and that until such an organization is formed we endeavor to establish contact by way of correspondence and literature with the National Farmers' Union of Scotland."

In a letter received at the U.F.C. headquarters, the secretary of the Scottish union expressed surprise that farmers had no national organization in Canada, and hoped that it would be possible to co-ordinate the work of the various provincial organizations through a central executive which to begin with, might act in an advisory capacity.

Commenting on the proposal, Frank Ellison, secretary of the U.F.C., said: "Everywhere throughout the Empire there seems to be a move towards closer relationships in agriculture for the control of surpluses and for the stabilization of prices and thus place agriculture on a sound business basis. The U.F.C. administration is anxious to develop this movement and will do all they can to bring about a co-ordination of the provincial organizations as they realize more and more that farm products must be controlled by the farmers themselves in order to stabilize prices on a basis that will make agriculture prosperous."

Western Horses Go East

Shipment Of 18 Animals Sent From Moose Jaw To New Brunswick

In order to try out the market for certain types of horses in New Brunswick, a shipment of 18 animals was consigned from Moose Jaw to the Maritime Province by the Saskatchewan Livestock Pool and the Department of Agriculture. Under the arrangements entered into between the Livestock Pool and the Federal and Provincial Governments, the Pool assembles the shipments and the two Governments assist in promoting the sale of the horses. Larger shipments are to be made in the near future.

No Introduction Needed

Canadians Are Welcomed At Any International Gathering

Canada is the most promising country in the world, in the estimation of the statesmen assembled for the League of Nations council, Hon. J. C. Elliott, Minister of Public Works, stated on his return to Ottawa from Europe. To have come from Canada is a first class introduction in any international gathering, he said. Mr. Elliott was one of the Canadian delegates at Geneva this autumn.

His Explanation

Tommy had a new puppy, of which he was very proud, so he asked his little pal, Mary, who was a very thin child, to come and make its acquaintance.

The puppy seemed to take quite a fancy to Mary, and followed her all over the place.

"Why, Tommy," she cried proudly, "I believe your puppy like me better than you!"

"I suppose you know why," retorted Tommy, slightly jealous. "It's because he thinks you're a bone!"

Egyptians Reverence Palm Tree

The date palm tree is a sacred thing. For thousands of years it has been to the Egyptian folk and to the nomads of Africa the tree of life and the tree of death. Its dates are so nourishing that with frugal regimens they are a principal article of food. Upon its transparent bark was written, in ancient hieroglyphics, the first awakening of human thought. Its wood provided coffins for the old Egyptian tombs; its cascanes perfumed the wrappings of mummies.

The enamel of a tooth is practically the same composition as crystalline phosphate rock.

Jap Diplomats Land

"The destinies of Canada and Japan lie together in the great Pacific Ocean," declared Hon. Yumeno Tokugawa, K.C.V.O., first minister to represent the Emperor of Japan in Canada, when he reached the Dominion on board Canadian Pacific liner "Empress of France," at Vancouver, recently. With him is photographed Togo Fukuma, Japanese Consul-General. Mr. Tokugawa is the son of Prince Iyemoto Tokugawa, and a man of long experience in diplomacy. He was on his way to Ottawa to present his credentials to the Canadian Government from the Japanese Emperor.

Miracle Of Conducting

Dr. Erich Fischer, a Swiss engineer, has completed an invention whereby orchestras in different countries can be conducted simultaneously by wireless. An experiment will be made at Zurich shortly, when orchestras in London, Paris, Berlin, and Milan, under Dr. Fischer's command, will unite in transmitting a new hymn to commemorate the tenth anniversary of the League of Nations.

Whales depend upon hearing more than any other sense to protect them from their enemies.

Evidence Of Ancient Custom

It was customary with girls in ancient Greece and Rome to offer, when they approached the marriageable age, their dolls to Venus or Diana. Many of these ancient dolls, made of wood, clay, ivory or wax, have been found in tombs of Greek and Roman origin. These curious votive offerings seem to have been universal in the ancient world.

If species adjust themselves to adversity, as the evolutionists say, why hasn't lawn grass learned to grow so high and then quit?

FASHION

No. 143—Modish—Slender. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrasting.

No. 910—Distinguished Model. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrasting.

No. 498—Morning or House Dress. This style is designed in sizes 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrasting.

No. 526—Grown-Up Style. This style is designed in sizes 6, 8, 10 and 12 years. Size 8 requires 2 yards of 40-inch material with 3/4 yard of 27-inch contrasting.

No. 965—Cunning Bloomer Dress. This style is designed in sizes 2, 4, 6 years. Size 4 requires 2 1/4 yards of 36-inch material.

Emb. No. 1115—Luncheon Set. Pattern contains four interlens 7 by 10 inches, six flower sprays 2 by 3 inches, and eight applique designs, four 3 by 2 1/2 inches, and four 2 by 3 inches (blue).

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Projected Trans-Atlantic Air Service From Canada To England via Greenland

Seed Oats To Be Supplied

Farmers In Saskatchewan Dry Area Should Order Early

That arrangements were made some time ago for the purchasing of seed oats for farmers in the drought affected districts of Saskatchewan, is announced by Hon. W. C. Dudgeon, Minister of Agriculture, who stated that a considerable portion of the oats required for this purpose have already been bought and deliveries are being made to the Canadian Government Elevator, at Moose Jaw. R. M. Johnson, of Pasqua, acting as seed purchasing commissioner, has represented the government in these transactions, but is not purchasing fodder as has been reported in the press.

Investigation reveals the fact that while there is in Saskatchewan a sufficient quantity of oats to meet feed requirements, there does not appear to be sufficient seed oats, consequently purchases have been made in the province of Alberta in addition to those which have been and are being purchased in Saskatchewan.

The Department of Agriculture is receiving offers of seed oats grown in Saskatchewan and is making selections from these of quantities suitable for seed purposes. It is not expected that there will be any difficulty in getting a sufficient supply of seed oats which are suitable for seed and for that purpose instead of for fodder. It is also expected that prices to farmers in the affected areas will be within reasonable bounds for grades No. 1 and No. 2 seed. The department will be in a position shortly to fill orders for carloads of seed oats purchased by rural municipalities.

The minister stated also that in his opinion it would be well for farmers to make arrangements at an early date to provide for their seed supply in order to avoid possible disappointment.

Grain Mixtures For Feed

Practice Of Sowing Mixture Of Grains For Feed Over Growing Oats Has Little Value

There is apparently little advantage in sowing mixture of grain for feed over growing oats alone when a good variety is chosen. This conclusion, at least, may be drawn from an experiment that has been going on for several years at the Fredericton, N.B. Experiment Station, and which is published in the report of the superintendent for last year, which may be secured from the publications branch, Department of Agriculture, Ottawa.

Three plots were sown with mixtures and three with single varieties. The grain was sown at Huron wheat, Victory oats and Charlottetown No. 80 barley. For the past four years the average yield has been highest with Victory oats which were sown at the rate of three bushels per acre. The yield was at the rate of 1,648 pounds to the acre, as against 1,643 for a mixture of wheat one peck, oats two bushels, and barley one bushel. The next lower yield was 1,600 pounds from a mixture of wheat two pecks, oats and barley one bushel each. When wheat, oats and barley were sown in equal amounts of one bushel each to the acre the yield was 1,500 pounds. The barley alone sown at two and one-half bushels to the acre gave a yield of 1,316 pounds, while Huron wheat sown at one bushel and three pecks, yielded 708 pounds as an average for the four years.

In another series of experiments barley and oats when sown in combination and at different rates were compared with oats and barley sown alone. The highest average yield for the four years was 1,764 pounds to the acre from a seeding of one bushel of barley and two bushels of oats. Victory oats alone gave the next yield of 1,648 pounds, it was followed by oats six pecks, and barley six pecks, sown together, of 1,584, while oats one bushel and barley one bushel, gave 1,471 pounds, and barley alone, 1,316 pounds to the acre. In the second series of experiments the highest yield was obtained from a mixture of two parts of oats, one part barley sown at the rate of three bushels to the acre.

Clerk—Do you want a room for 50 or 75 cents?

Stranger—What's the difference between them?

Clerk—in the 75-cent room we put a rat trap.

The fishing industry of Manitoba contributes more than \$2,000,000 annually to the production figures of that province.

Details of the projected trans-Atlantic air service from Canada to England via Greenland, are contained in information received by the Civil Aviation Branch of the Department of National Defence, at Ottawa.

The scheme, which calls for an elaborate outlay of airports and radio beacons from Winnipeg to Baker Lake, and from Baker Lake to Cape Dyer, in Canada, is advanced by Warren Scholl, a consulting engineer from Chicago, who is now staying in Winnipeg.

Mr. Scholl is seeking to promote the scheme, which calls for a daily service between Chicago and Croydon, using Winnipeg as the main stopping point on this continent. He plans to operate a shuttle service between New York and Winnipeg, as well as between the western city and other important population centres.

From Cape Dyer it is planned that planes should fly to Southern Greenland where an airport would be established on the level surface of the ice cap. From Greenland planes would fly to Iceland, to the Faroe Islands, and over Ireland to Croydon.

Mr. Scholl is seeking to organize three separate companies, one in the United States, one in Canada, and the third in Great Britain, which would bear the cost of the whole scheme between them.

His plan calls for the floating of separate loans in each country and for the exchange of blocks of stock between the three countries involved, so that the loss would be equally distributed.

Planes used in the service would be amphibians, of all-metal construction. Pilots would be guided over the entire route by radio beacons, which Mr. Scholl thinks, would defeat the hazards of navigating by flying. Super-sensitive altimeters would enable pilots to make blind landings with an accuracy of four feet, considered by authorities to be a safe margin. The route would not be lighted, although airports would be equipped with the most modern of lighting equipment.

Revenue would be derived through the carrying of passengers, mail and express. The machines would have a capacity of not more than 20 passengers, while a system of deferred ex-rates, where the carrying of cable rates, would be instituted to make up pay loads on days when the passenger quota was small.

Where the Rain Goes

Experiments Show Largest Amount Returns To Atmosphere Through Evaporation

Where does the rain go? A three-year study by the United States Geological Survey has answered this question. The Pomperaug Basin, in Connecticut, which is believed to be typical of the country at large, was given intensive study. The results, says Popular Science Monthly, showed that of the annual rainfall of 44 inches, 21 inches flow out through streams. The other 23 inches return to the atmosphere. Evaporation from the soil, from water surfaces, and from the leaves of trees account for these tons of moisture that enter the air.

Spelled The Show

The Dramatic Society was presenting an historical play, and one of the newly-spelled members had been assigned a part with exactly one line to speak. He was the headman, and arrayed in all the glory of black tights and mask, he strode on to the centre of the stage and announced: "My lord, my lord, I have beheld the maid."

"Oh, you've 'ave, 'ave you?" retorted another small-part man in the guise of the cruel king. "Well, allow me to tell you that you've missed up the 'ole blooming show. You've been and done it two acts too soon."

One thing we haven't seen yet is a paper guest towel.

WORLD HAPPENINGS BRIEFLY TOLD

Frau Schroeter-Voreson, claims the record parachute drop from years from 2,500 meters (8,200 feet). She carried a sealed altitude indicator.

Right Hon. Winston Churchill, former chancellor of the exchequer, has been elected lord rector of Edinburgh University.

Marquis Katsumasuke Inouye, former Japanese ambassador to London, died November 4, at Tokyo. He was 68 years old.

Dr. Frederick Montizambert, former director-general of public health and sanitary advisor to the Dominion government, died at his residence, in Ottawa, after a prolonged illness.

The London papers say that the Prince of Wales is planning to return to Africa to finish the tour which was so suddenly interrupted last year by the serious illness of King George.

Legal difficulties in the way of purchasing by the Prince of Wales, of a section of school lands in Alberta as part of the E.P. Ranch have been set aside as a result of an order-in-council officially published in the Canadian Gazette.

The title of the forthcoming book of Georges Clemenceau, former French premier, on which he has worked so hard during his recent illness, is "Grandeur and Misery of a Victory."

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

A New Ailment

People Seem To Be Troubled With Health Madness

Articles are already appearing in daily papers on how to conquer "autumn depression." They follow quickly on tips for overcoming summer sickness. Very soon we shall be told the best way of relieving winter gloom, and after that we shall look eagerly for a specific against spring depression. Every season has its disability. We are rapidly becoming health mad. The great majority seem to be unable to make up their minds what to eat, drink, wear, or do without assistance.

For Road Surfacing

Big Development Seen For Next Year In Connection With Alberta Bituminous Sands

S. C. Ellis, of the Federal Department of Natural Resources, back from his summer's work in the north, expressed his belief that there will be large developments next year in connection with the McMurray bituminous sands. He is convinced from what he has seen of low cost surfaced roads in the United States that there is a bright future for the McMurray sands for road surfacing purposes.

The population of the Roman Empire at the time of Christ has been estimated to be 70,000,000.

The chain store idea has been introduced in Egypt.

Crossed River On Skis

Vienna Men Claim Speed Of Twelve Miles An Hour

A most amusing spectacle recently greeted the spectators on the London Embankment, when, without any warning, they suddenly came across two men, clad in bathing suits, attempting to cross the Thames by means of water skis. It did not take many minutes for a wondering crowd to collect, and then, urged on by cheers and laughter, the two men, Student Franz Kirsch and Professor Michael Mitter, both from Vienna, set off on their journey across the river and back.

The skis were made of basket-work frames, and covered with waterproof. The wearer carries a small paddle with which he propels himself along. Apparently they answer their purpose well, and the two wearers claimed that they had achieved up to twelve miles per hour on the river Danube.

Washable Shoes

Cotton Footwear Said To Be More Comfortable Than Leather

It won't be long now until the ladies will take their shoes off, give them a few scrapes on the washboard, and hang them out to dry.

Washable cotton shoes were among the most interesting exhibits at the fashion show of the National Association of Cotton Manufacturers held in Boston, Mass.

The shoes in addition to being washable, will be much lighter and more comfortable than leather, exhibitors said. They are made of sudanette and sudanette faille—new cotton fabrics—and will have heels built on thin leather soles. The uppers, in pastel shades, will be bordered with a fringe of beaver embroidery.

Precision In Levelling

Only Slight Error Made In Running Line Of Levels 3,647 Miles

In a line of precise levelling runs across the continent from mean sea level on the Atlantic to mean sea level on the Pacific, the engineers of the Geodetic Survey of Canada obtained an apparent difference of elevation of only about six inches. On the assumption that the mean sea levels of the two oceans are about the same, this indicates that only the above slight error was made in running a line of levels 3,647 miles in length.

An Oil That Is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish on the Pacific, the engineers of the Geodetic Survey of Canada obtained an apparent difference of elevation of only about six inches. On the assumption that the mean sea levels of the two oceans are about the same, this indicates that only the above slight error was made in running a line of levels 3,647 miles in length.

Tests For Air Pilots

Prospective Flier Has To Pass Rigid Examination Half-Yearly In States

Can you stand on one foot fifteen seconds, with your eyes closed and the other leg bent backward at the knee, and not fall? If so, and if your ears are healthy and your gait shows no disturbance, you have passed the equilibrium test given airplane pilots. The old whirling chair test has been discarded.

But that doesn't mean the prospective pilot's physical examination is ended. More than 700 physicians under the direction of Dr. H. L. Bauer, of the Department of Commerce, are seeking to protect passengers against accident due to any physical defect on the part of the pilot.

First come the eyes, defects of which cause 75 per cent. of the rejections for unfitness. The pilot's eyes must have depth perception, for a flier constantly must judge distance in taking off and landing. Eye muscle co-ordination is necessary.

"Lack of co-ordination and the ability to maintain single vision," says Dr. Bauer, "is likely to cause fatigue. Fatigue causes headaches. Headaches cause inattention. Inattention causes carelessness."

Color vision is important, too, because the pilot must be able to recognize navigation lights and other signals. Shades of brown and green, and the ground indicate the character of the terrain to aid in landing. A wide field of vision is essential because a pilot must be able to see objects out of the corner of his eye while looking straight ahead. Then general physical examination is thorough, with the nervous system drawing special attention. After a pilot is once examined and passed, he is required to take physical examinations semi-annually.

Recipes For This Week

(By Betty Barclay)

RICED OYSTERS SUPREME

1 1/2 lb. shredded cocoonut.
2 eggs.
2 cups of milk.
1/4 teaspoon salt.
1/4 cup sugar.
1 1/2 cups cooked rice.
1/4 teaspoon vanilla.

Beat the eggs thoroughly, yolks and whites together. Add the milk, salt and sugar, stir in the rice, cocoonut and vanilla, and turn into a baking dish. Place in a pan of hot water and bake twenty to thirty minutes in a moderate oven—about 350 degrees Fahrenheit.

TWO EMERGENCY SALADS

Cabbage Fruit

Peel oranges, removing all white skin. Cut into one-fourth inch slices and then into segments. Cover salad plates with finely-shredded cabbage. Sprinkle with orange segments. Serve with French dressing.

Cheese Ball Salad

Peel oranges and divide into segments, rejecting all white inner skin. Arrange on salad plates covered with lettuce. Garnish with balls of cream cheese rolled in grated orange rind.

There is no poisonous ingredient in holloway's Corn Remover, and it can be used without danger or injury.

Unnecessary Questions

Police-men of London are secretly complaining that they must be too versatile. In recent post examination they were asked, among other things, how they would repair a stained floor in a house, make a three-legged stool or arrange a film show for children between 10 and 15.

Zoo records indicate that animals tend to live longer if they are well cared for in captivity than those that live in a wild state.

China and Japan are said to have 200,000 square miles of coal fields.

The curvature of the earth is about eight inches per mile.

Almost every part of the whale has a commercial value.

Use Minard's Liniment in the Stables.

SUNDAY SCHOOL LESSON

NOVEMBER 17

LIVING WITH PEOPLE OF OTHER RACES

Golden Text: "Of a truth I perceive that God is no respecter of persons; but in every nation he that feareth Him, and worketh righteousness, is accepted of Him."—Acts 10:34, 35.

Lesson: Ruth 1:1-18; John 4:5-10; Acts 10:1 to 11:18; Romans 1:14; Galatians 3:28, 29.

Devotional Reading: Ephesians 3:14-21.

Explanations and Comments

Racial Prejudices Must Be Overcome, Acts 10:1-15.—There was a Roman centurion at Caesarea, Cornelius by name, a very devout man who feared God, and was generous with the poor. One day in a vision he seemed to hear an angel saying to him, "Thy prayers and thine alms have gone up for a memorial before God," and he felt that he had found a man named Peter. At once Cornelius sent two of his servants in search of Peter. Joppa was on the seacoast thirty miles west of Jerusalem.

On the morrow as the servants were searching Joppa, Peter went up on the housetop to pray. He was hungry and while waiting for food to be sent down into a trance. In his trance Peter beheld a receptacle resembling a great sheet let down from heaven by its four corners, and in it all manner of four-footed beasts and creeping things and birds, and he heard a voice bidding him kill and eat. "Not so, Lord, I have never eaten anything that is common or unclean," Peter exclaimed, horrified.

God is No Respector of Persons, Acts 10:17-35.—While Peter was pondering the meaning of the vision, the messengers from Cornelius arrived. Peter called them in and lodged them over night, putting at once into practice his understanding of the vision, for they were men of another race, whom once he would have called unclean. The day following Peter went with the messengers to the house of Cornelius. He took the precaution to take with him six brethren, for he had a vision of a vision, and he wanted to send for the apostle, and added, "Now therefore we are all here present in the sight of God to learn of things that have been commanded thee of the Lord."

"And Peter opened his mouth and said" (these words indicate the solemnity of the occasion and the weightiness of Peter's message): "God has no respect of persons, and he who reverences Him and lives a good life in any nation is welcomed by Him."—Moffatt's Translation.

Cultivate National Spirit

John Imrie Tells Easterners About Our Greatest Problem

"While we have many economic problems in Canada, our greatest problem is not economic but spiritual. It requires maintenance of a national outlook and a national spirit in the face of a geography that is a constant invitation to sectionalism," said John Imrie, managing director of the Edmonton Journal, in an address at Halifax recently.

Mr. Imrie spoke on "Carving out a New Northwest," and declared the present movements to the north and west of Canada were much broader than previous immigration and settlement waves.

Referring to unemployment recommendations of the Duncan report, he said: "The rest of Canada owes it to the Maritimes to see that these recommendations are made effective."

A Unique Cricket Match

A cricket match between sides of 400 each — played in Samoa for a stake of 100 kegs of beer—lasted for three months and ended in a two day fight. The teams represented two native villages, which at the end of the three months were in a state of starvation because the men had neglected their families in favor of the game! Thus the free fight, in which several lives were lost.

B.C. Coal Production

The production of coal in the province of British Columbia for the first nine months of the year which ended with September 30, shows a total output of 1,693,340 tons. Of this total, Vancouver Island coalleries produced 850,364 tons.

More than 45,000 thunderstorms each day is the record for the entire earth.

The height of the rays of the Aurora Borealis varies from 50 to 200 miles.

The first patent of the telephone was granted in 1876.

Minard's Liniment relieves stiffness. Every person uses on an average of 12 pounds of soap annually.

Breaks Up Gas In the Stomach

Don't suffer from dangerous gas pressing around your heart, from sourness, Stop worrying. Whenever you need quick stomach relief take a little Bismarck's Menthol Powder. It breaks up gas, neutralizes acids and keeps the system sweet and strong, and digestion perfect. At all good drug stores.

Spectacles For Color Blind

Special Glass Absorbs Rays Troublesome To Such Persons

Spectacles through which a color-blind person can distinguish colors like people with normal eyes, are finally promised, at least for some varieties of color-blindness, by new glass materials perfected by Professor Franz Weidert, of the Technical College in Berlin. The materials resemble ordinary glass but contain the rare chemical elements neodymium and praseodymium. In thin sheets of lenses like those used in spectacles, the new glasses seem almost perfectly transparent. Examination with a spectroscopic discloses, however, that certain rays of the complete rainbow-colored strip into which white light is separated by that instrument are missing after the rays have passed through these new glasses. The glasses absorb these rays, the particular ray which is absorbed differing for different chemical compositions of the new glasses. The rays chiefly absorbed happen to be orange and yellow ones, the German physicist reports, standing in the spectrum between the red and the green, which are two of the colors most troublesome to color-blind individuals. The removal of these intermediate rays by the new glasses acts, it is found, to increase the apparent contrast, between red and green so that spectacles of the new glasses are expected to make the distinction of those two colors easier for people who are color-blind.

Exact Distance Important

Astronomers Must Know How Far Away Sun Is

The distance of the sun is to be measured through work at the University of Cincinnati in co-operation with the Royal Observatory of Berlin. The latest computation, accepted by astronomers fixes the mileage at 92,800,000, believed to be within 50,000 miles of the exact distance.

Why bother about fifty thousand miles?

"Because," answers Dr. Jermain G. Porter, director of the Cincinnati Observatory, "most important of all the problems presented by astronomy is that of finding how far away the sun is. For this distance is our measuring rod by which we determine the exact extent, not only of the solar system, but of the vast outlying universe as well."

Astronomers use a planet as a stepping stone to help them reach out with more accurate computations toward the sun's exact position. They get a measurement of the distance to a nearby planet, and use that as an aid. In the present measurement, Eros, the latest planet discovered, found only a few years ago, and but 14,000,000 miles away from the earth is the stepping stone. At the beginning of 1931 it will be in an extremely favorable position for the solar work. Meanwhile, several years of preparation are necessary.

Must Be a Rensou

"Hey, Ma," said Willie, pointing to the orchestra leader at the famed soprano recital, "why does that man keep hitting that woman, huh, Ma?" "Sh-sh! He's not hitting her; he still."

"Well, then, what's she hollerin' for?"

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women to tell them the wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be too thankful for the benefits I received during the changing stage of life. I do housework and my troubles made me too tired to work. A friend advised me to try the Vegetable Compound. I got relief at once, began to regain my appetite, and my nerves got better. I will recommend it to all with troubles like I had."—Mrs. John Benson, 162 N. Christina St., Sarnia, Ontario.

ASK SUSPENSION OF MONEY GRANTS FOR MILITIA

Winnipeg.—Demand for cessation of all money grants by the dominion provincial and municipal governments for military purposes was contained in a resolution passed by the all-Canadian Congress of Labor in annual convention here.

Abolition of the entire cadet movement from Canadian schools was also demanded in the resolution, which urged that no further money grants be made for cadets.

Heated opposition by a number of delegates to the clauses demanding that no money grants be made for military purposes by the various governments kept the issue before the convention for the greater part of the afternoon and only by a small margin was the resolution passed.

Alleged discrimination by certain United States industries operating in Canada was brought out in debate on a report of the executive board reviewing labor conditions in Canada. Feeling against the International Labor Union was manifested by several speakers. The American firms were alleged to have demanded that no other unionists but those belonging to the International union be given employment.

It was charged in the executive board's report that the craft unions, controlled by the American Federation of Labor, were responsible for the "impotence of the workers, politically and economically, in their own country, and responsible for the slight regard in which labor had been held in Canada."

The congress decided to request the Ontario government that boarding schools be constructed at intervals of not more than 120 miles in the territory west of the Great Lakes to the Manitoba boundary.

German Air Liner Wrecked

Six Persons Were Killed and Two Injured In Crash

Marden Park, Surrey, England.—Six persons were killed and two injured in the crash of a German air liner bound for Berlin from Croydon. Three of those killed were passengers and three were crew members.

One of the survivors was Prince Eugene Schauberg-Lippe, second cousin of a former reigning prince of the old German royal house. He was acting as second pilot. The prince was injured but is expected to recover. The other injured man, Lieut.-Commander Glen Kidston, widely known racing motorist, suffered cuts.

The crash which was followed by the machine bursting into flames, is believed to have been caused by the pilot flying into a hillside during a fog.

Behind the remnants of the air liner was a large tree which had been torn from the ground by the big machine's last lunge. The crash and the burst of flames followed instantly, and, after a few blazing seconds, there remained only the charred wreckage in which the victims had been trapped.

Coming To Canada

Thousands Of Mennonites Would Leave Russia For This Dominion
Moscow.—Three thousand Siberian Mennonites, mostly German descent, mostly Mennonites, have received passports to migrate to Canada. Before granting the passports the Soviet authorities exacted full payment of taxes and specified that the emigrants deposit all their possessions in Soviet banks, since exportation of rubles is forbidden.

Seven thousand of the would-be emigrants are concentrated in camps around Moscow obtaining passports at the rate of 100 per day.

Walker Again Mayor Of N.Y.

New York.—Mayor James Walker, more familiarly known as "Jimmy" to the millions of the metropolis, was swept into office again for another four years on the crest of a Democratic tidal wave of great proportions. He defeated Congressman Fiorello H. LaGuardia, candidate of the Republicans and Fusionists, by a plurality of 407,165.

Prince Will Resume Tour

London, Eng.—King George and Queen Mary have officially approved the Prince of Wales' tour of Africa, interrupted last December when the King fell ill. It is expected the Prince will sail for Capetown on the steamer "Kenilworth Castle," January 3rd.

Dog Rescues

Wounded Trapper

Carried Note To Nearest Camp and Returned With Help

Nakina, Ont.—Once again man owes his life to the intelligence and faithfulness of a dog. Andrew Syvitski, 22, accidentally shot himself when he drew a revolver from his holster while hunting at an isolated camp at Pine Lake.

Realizing his predicament and knowing that he could not reach the nearest trapper's cabin himself, Syvitski scribbled a note and fastening it to his dog's collar, ordered the animal to proceed to the nearest camp, owned by Thomas Hughes.

The dog ran through three miles of bush and swam a river to reach Hughes' cabin.

Hughes, with the animal leading the way, reached Syvitski's camp and after rendering first aid, brought the man to his own camp. A railway speeder brought the wounded man to Nakina, and he was later rushed to Port Arthur by train.

Aviators Killed In Montreal

Seaplane Of Canadian Government Crashed While Being Tested

Montreal.—Pilot Officer Paul Garton Stanley, 29, of Toronto, and flying officer John L. McLaughlin, 35, of Montreal, were almost instantly killed when a Canadian Vickers "Vedette" seaplane which they were testing for the Canadian government crashed in a field near Sault Aux Reclottes. The plane buried its nose in the soft surface of the field and by the time the two airmen were released they were dead, crushed in the wreckage.

McLaughlin was a test inspector and Stanley was flying the seaplane. They had made a previous test flight early in the day but the weather conditions were not suitable for flying and a second flight was attempted in the afternoon. It was believed that the machine had gone into a spin at a time when, owing to the low "ceiling" the pilot was unable to recover before reaching the ground.

Take Money and

Food From Peasants

Families Migrating From Germany Deprived Of Everything Is Report

New York.—The following wireless from Kiel, Germany, was published in the New York Times:

"The following wireless from Kiel, Germany, was published in the New York Times: comprising 323 persons, whose ancestors migrated from Germany to Russia under Catherine the Great, and who, together with about 5,000 other peasants desire to migrate to Canada, arrived here aboard the Soviet steamer 'Felix Dzerzhinski,' without money or food.

"According to their own statement they were searched bodily before sailing and deprived of all money and food.

"It is rumored the Canadian government has already agreed to pay for their transportation to Canada and to provide the peasants with agricultural tools and other necessities."

Cheers Greet Premier

MacDonald Receives Hearty Welcome From Members Of House

London, Eng.—Taking his place on the front bench of the House of Commons for the first time since his return from his notable visit to America, Premier MacDonald was greeted with loud cheers from the members. Many of them rose to their feet and waved their order papers in salute.

Mr. MacDonald, resuming the leadership of the government in the Commons found a packed house awaiting what promises to be a highly important utterance on unemployment from Rt. Hon. J. H. Thomas, Lord Privy Seal and Minister of Employment.

This is an issue that friends and foes of labor are watching with the keenest attention and the government's handling of it has vital bearing on its fate.

Postpone Pool Convention

Brandon, Man.—The Manitoba Wheat Pool has postponed its annual convention. Instead of meeting in the city, November 5, as originally planned, the convention will gather here on November 10, 20 and 21.

Gold For France

Cherbourg, France.—The first gold from the United States since the great war—\$3,000,000 in 66 kegs was unloaded recently from the "Bergengaria" for Paris banks.

W. N. U. 1811

Predicts Era Of Disease

New York Physician Says Slum Conditions In Europe Unbelievable

New York.—Senator Royal S. Copeland, of New York, on his return from a twelve weeks' visit to Europe, said he never saw such abject poverty as in the slums of European cities. He said conditions in the poorer sections were almost unbelievable and predicted they would result in an era of disease. "This country," he said, "must guard itself against that by strict immigration regulations. The examination of aliens must be more thorough and there must be more men to do it."

Senator Copeland is a physician and a former commissioner of health in New York City.

PROBLEMS AWAIT NAVAL PARLEY IN JANUARY

Washington.—In the swing of time toward January and the five-power disarmament conference in London, the government here and officials of the state and navy departments are hard at work upon the case for the United States. While in the main Great Britain and the United States are agreed upon what status it is necessary for each to maintain in the much-discussed cruiser class, it has been emphasized here again and again that no satisfactory agreement may be arrived at without the assent of all the powers concerned, and this opens a wide field for research containing both technical and political elements.

Secretary of State Henry L. Stimson has been for some weeks past continually in touch with the general board of the navy and the Under Secretary of State Joseph P. Cotton, have also consulted frequently with President Hoover.

Ambassador Charles G. Dawes, a fourth member of the delegation, is expected to stay for some time at the White House, during his present visit here from London, an opportunity will be afforded them for complete canvassing of the whole position. President Hoover places large hope upon the London conference.

The chief problem as the situation is viewed from Washington, concerns the powers of France and Italy and Great Britain and geographically as situated in the Mediterranean.

First, France and Italy must arrive at an agreement upon parity, which they may do between themselves. But both France and Italy are opposed to the abolition of the submarine, favored by both Great Britain and the United States.

"The poor man's battleship" has an interesting significance in the Mediterranean, wherein is one of the great trade routes of the British Empire.

Another matter which receives attention here is the proposal of France that London results should be validated at Geneva—a suggestion which finds no favor in the United States.

Japan, it is indicated, would like to have her cruiser strength proportionately to the British and American fleets, making her seven to ten instead of as at present.

MENTIONED FOR IMPORTANT POST

Lord Arnold, British paymaster-general, who accompanied Ramsay MacDonald on his visit to this country, is being prominently mentioned in British Labor party circles as possible successor to Sir Esme Howard, British ambassador to the United States, soon to return from Washington.

Americans Settling

In Saskatchewan

Many Farmers Coming To Make Homes In Canada

North Portal, Sask.—Despite the winter weather settlers from the United States are coming to Western Canada. During the past few days six carloads of stock and effects have cleared customs at this port. Alfred Halsewood shipped two cars from Wendell, Minn., to Aurore, Sask., where he had farmed for some years, but a year ago returned to Minnesota and started in poultry and dairy farming. The call of the broad prairies was too strong.

Frank McKnight, also a Canadian many years ago, shipped two cars from Noyes, Mont., to Leslie, Sask., where he is renting land from a brother. While in the Soo yards at Portal, N.D., McKnight was struck by a freight engine, his leg being injured so that he had to be taken to a hospital for treatment. His stock and effects were looked after by Clarence Reed, who was a neighbor in Montana and who also is immigrating to Leslie, Sask., with a car of stock. Mr. McKnight was able to leave the hospital later and left for Leslie on a passenger train.

L. Matson, from Burlington, N. D., shipped a car to Hythe, Alta., where he has taken a homestead.

Would Fly Across Atlantic

Russian Airmen Ask Permission To Resume Return Journey

New York.—The four Russian aviators, members of the crew of the "Land of the Soviets," which flew from Moscow to New York, have wired Soviet officials for permission to fly across the Atlantic ocean to England. They hope to leave in two weeks from Harbor Grace, Newfoundland.

Semyon Ashestarov is chief pilot and commander of the Soviet plane, and P. E. Bolotov, B. V. Strelgov, and D. V. Fufayev, are members of the crew.

TWO GREAT PREMIERS MEET

Right Hon. J. Ramsay MacDonald, Prime Minister of Britain, compares notes with Right Hon. W. L. Mackenzie King, Prime Minister of Canada, when the two premiers met at the Canadian National Railways station, Ottawa, where Premier MacDonald had just alighted from the car "Bomaventure," which carried him across Eastern Canada.

India Favors Idea

Of Dominion Status

British Viceroy's Declaration Has Removed Tension From Politics

New Delhi, India.—Opinion in India has now crystallized into definite comment on the Viceroy's historic declaration of November 1, making it clear that the favorable response is wider than might have been expected. The Viceroy's affirmation of the British government's desire that India should attain dominion status in the fullness of time, and pointing out a conference should be held in London to clear up relations between British India and the native states of India, is described as removing with one bold stroke all the electric tension from Indo-Panjab politics.

Anglo-Indian newspapers not only were the first to describe the announcement of November 1, but they also presented the opposition voiced in the British press. Both progressive and press opinion is being modelled on the lines of the statement issued by 30 members of the Indian Nationalist Congress and other leaders, including M. Ghadrani, great upholder of Indian nationalism. This statement, given conditional acceptance, suggesting a livelier spirit should be infused into the government of the country until a new constitution for India actually comes into existence.

The depressed masses and Indian Christians welcome the Viceroy's announcement and ask that their interests be protected at the conference.

RELATIONS WITH RUSSIA RESTORED BY LABOR PARTY

London, Eng.—Full diplomatic relations are to be restored between Great Britain and Russia.

By a vote of 324 to 199 the House of Commons have approved the government's motion for resumption of such relations and at the same time rejected a Conservative amendment which had condemned any resumption until the preliminary conditions have been satisfied. There were stipulations in regard to Soviet propaganda.

The decision regarding Russia capped a full day in both the House of Commons and the House of Lords, for the upper chamber was occupied with the latest development in the Indian constitutional problem. But Sunday is not often experienced, even at Westminster.

The Commons began eagerly, expecting Prime Minister Ramsay MacDonald's report of his mission to the United States, and his subsequent visit to Canada. Suddenly, however, the House of Lords began a debate on the "mystery of the proclamation by Lord Irwin, viceroy of India, which affirmed the British Government's desire to accord full dominion status to India in the fullness of time."

The doom of the Conservative amendment regarding relations with Russia was speedily sounded in the House of Commons by Right Hon. David Lloyd George, Liberal leader, who wielded the balance of power. Right Hon. Stanley Baldwin had charged Right Hon. Arthur Henderson, foreign secretary, with "surrendering" to the Soviet representative in the negotiations leading to resumption of relations. Mr. Henderson denied there had been any surrender.

The foreign secretary stressed that under the new protocol, the governments of Great Britain and Russia would reciprocally confirm the pledge in regard to propaganda immediately the actual exchange of ambassadors took place.

Mr. Lloyd George then indicated the Liberal attitude by describing the break in relations with Russia initiated by the former Conservative Government, when Arcos House, in London, was raided "as an act of supreme silliness." He concluded "I say God speed the foreign secretary."

Several Conservatives supported the Labor Government in the division. These included Lady Astor, John Buchan (noted novelist), and Robert Boothby, member for Eastern Aberdeen and Kincardine.

The vote approving the government's motion for restoration of relations, marked the first definite accomplishment of Mr. MacDonald's government since other negotiations in the foreign fields, as well as schemes for relief of domestic unemployment, have yet to be submitted for parliamentary approval.

Not a single dominant had expressed opposition to the policy which had been pursued, declared Mr. Henderson. Replies received by the government indicated it was generally recognized that the renewal of relations sooner or later was inevitable.

GERMANY SEEKS RESTORATION OF LOST COLONIES

Paris, France.—Germany, having gained satisfaction on her demand for an early cessation of the Rhineland by the Allies and seeing experts gathered to discuss her request for a return of the Saar and its rich mines, is now looking ahead to the last of her ambitions, the restoration of her colonies lost by the treaty of Versailles.

French political pessimists contend that there is no reason to believe that Germany will fail in this mission any more than she did in the others. Officially, the French government insists that there have been no overtures and that the question has been settled by the peace treaty.

The peace treaty has been altered so many times, however, that, as M. Clemenceau said recently, he could no longer recognize it as a child of his. Under the peace treaty, the French troops were to remain in the Rhineland until 1935, and at that time the Saar was to decide by plebiscite whether it would become French or German. All that has been wiped off the boards long ago.

At Versailles, Germany signed away her claim to her colonies: Kamerun, Togo, Southwest Africa, Tanganyika, Ruanda-Urundi, New Guinea, New Hebrides, Cameroons, Koochout and Loochoo. These peoples were placed under mandate to France, Belgium, England, Japan, and the British dominions of Australia, New Zealand and Union of South Africa.

The former German possessions are no longer colonies, but mandated territories, expensive heirlooms of the war to those who inherited their care. The mandate holders are privileged to spend vast sums of money building up and governing the mandated territories, but get nothing but worries in return.

R.C.M.P. Officers Transferred

Several Stations Reorganized Through Relinquishment of the Ritchie, Edmonton

Ottawa.—A transfer of officers in the Royal Canadian Mounted Police has been announced by Commissioner Stearns.

The reorganization of several stations is caused by the retirement of Supt. James Ritchie, Edmonton, after 38 years of service.

His place will be taken by R. E. Acland, Regina, formerly an inspector but recently promoted to superintendent. He will have charge of the work of the police in northern Alberta.

J. W. Spalding, also of Regina, formerly an inspector, has also been promoted to the rank of superintendent and given charge of the work in southern Saskatchewan.

Sir-Sergeant R. E. Mercer, Regina, has been promoted to the rank of inspector and will have charge of the Regina sub-district.

Gives Report On Settlement

Canadian Congress Of Labor Has Idea To Absorb Immigration

Winnipeg.—Large scale development of unoccupied areas in Canada through agricultural and industrial development is recommended by the executive board of the all-Canadian Congress of Labor, in the board report submitted to the third annual convention. Such a plan, it is advanced, would absorb immigration to this country without detriment to the Dominion. The co-operative settlement idea advanced by the Labor Congress executive is stated to be based on a plan advanced by Rt. Hon. George Lansbury, M.P., first commissioner of works in the Labor government of Great Britain. Attention was directed to an interview with Mr. Lansbury published in a current edition of the Canadian Unionist, organ of the All-Canadian Congress of Labor.

Sir Robert Balfour Dead

Was Well Known In Canada and the United States

London, Eng.—Death has claimed Sir Robert Balfour, a prominent figure in shipbuilding circles and a former member of parliament for the Patrick division of New Glasgow. He was in his 88th year.

Sir Robert was a partner in the firm of Balfour, Williamson and Company. He was well known in Canada and the United States, having lived for 26 years in the States, chiefly in San Francisco.

Orders are being received in England for light planes for use as air taxis in China.

Prairie Provinces Rich In Minerals

Can No Longer Be Considered Agricultural Only Says J. M. Imrie

"No longer may the Prairie Provinces be considered agricultural only," declared John M. Imrie, Managing Director of the Edmonton Journal, in his address on "Carving Out a New Northwest," given recently before the Toronto Canadian Club.

"Formerly barren," he proceeded, "has predicted that in 1933, only four years hence, Manitoba's mineral production will exceed in value her wheat crop. Saskatchewan has more than half of the proved Flin Flon belt, and further north has Stobie Rapids and several other areas in which recent discoveries and known geological formations give promise of rich mineral wealth.

"My own Province of Alberta, possessing 14 per cent. of the world's known coal reserves, is already running neck and neck with Nova Scotia in coal production. She has also quickly jumped into the first place in Canadian Provinces as an oil producer. And away to the north, hundreds of engineers and prospectors have been at work last year and this endeavouring with some success to wrest from Mother Earth her secrets of mineral wealth."

"In my Province our industrial production has increased by 50 per cent. in the last four years. Only a short time ago the Premier of Alberta quoted a leading industrialist of the East as predicting that within five years Alberta would be a great industrial province. And all the while in the far North the great Peace River country is receiving a new and greatly accelerated flood of agricultural settlers, who are steadily pushing back further north the boundaries of profitable agriculture."

Elk Island Animal Park

Canada's Second Largest Reserve Is Located Near Edmonton

Elk Island National Park, Canada's second largest animal reserve, is within an hour's motor ride from Edmonton, Alberta. The buffalo in Elk Island Park are unusually fine specimens of their kind. The pelage is particularly dark and thick and the animals are all sturdy and well developed. They are not as wild as when they were originally captured, but it is inadvisable for visitors to go near them on foot, though they may be approached with safety in an automobile. Both the moose and elk in this sanctuary are also well developed specimens.

Just a Comparison

Between Court System Of Britain and United States

In a recent issue of the New York State Medical Journal there was an interesting article which compared the court systems of the United States and Great Britain. Particular attention was drawn by the writer to the fact that, in the British Isles, before a man is admitted to the Bar he must demonstrate that he possesses the intellectual, cultural and moral qualifications entitling him to belong to a learned and honorable profession. No such qualifications are demanded in the United States.

Just An Encore

She—"I hear you fainted at the party last night and that they brought you to."

He—"Yes, and then I fainted again."

She—"Good gracious! And what happened then?"

He—"They brought me two more."

Xlograph is the name given to an engraving on wood or an impression thereof.

"The trouble with uplift work to day is that too much of it is confined to noses."

"What have you been looking for all this time?"

"My stud."

"It is in your shirt."

"As usual! Nothing in the place one expects to find it!"—Lustige Kolner Zeitung, Cologne.

W. N. U. 1811

Paint From Pilchard

Use Has Been Found For Once Despised Fish

It is now proposed to squeeze the oil out of the famous British Columbia salt water fish, the pilchard, mix it with lead from the Trail smelter, turpentine from Ontario, and certain coloring material and with a Canadian-made paint brush apply the solution evenly to the surface of houses, barns and other buildings constructed of British Columbia lumber.

The pilchard found himself during the war period. Before the war he was a despised fish, enjoying perfect liberty while his neighbors, the salmon, halibut, and cod, were regularly hooked or netted to make a Friday dinner for mankind. When the food shortage came, the B.C. pilchard was discovered to be a fairly palatable fish, overrich in oils. Since the war the market for pilchards has fallen off owing to the extreme fatness of the fish.

Experts of the Biological Board of Canada have now created a use for pilchard oil. They have found that it can be made a substitute for boiled linseed oil, used in making paint. Experiments in the coast climate and at Edmonton in the use of this paint have been satisfactory.

That vicious cannibal of the deep, the dogfish, is also becoming the object of scientific research. One of the biological staff at Prince Rupert has now found that the dogfish packs around with him a highly liberal content of "Vitamin D."

At Prince Rupert they experimented with some white rats suffering from rickets. Dogfish oil from the west coast of Vancouver Island was given the white rats and cures followed. This is said to prove that dogfish oil may be substituted for the famous cod liver oil. It may be good for the human family. It certainly will be a boon for the poultry along the British Columbia coast. For the laying hens need "Vitamin D," particularly in the winter season. Unoubtedly the work of the scientists has resulted in creating a new wealth-producing industry founded upon the carcass of a hitherto outlaw fish.—Vancouver Province.

Iodized Salt For Breeding Ewes

Experiments Would Indicate That Use Of Iodized Salt Is Beneficial

Whether the addition of iodine to salt for breeding ewes is a valuable practice has not yet been fully determined, but from an experiment carried on at the Fredericton, N.B. Experiment Station, two years in succession, it would seem to have a pronounced value. One-half of the ewes at the station were fed iodized salt from fall until spring, while the other half were given access to untreated salt.

The iodized salt was prepared by drying the moisture out of fifty pounds of common salt, and then sprinkling it with two ounces of potassium iodide dissolved in water.

The superintendent of the station in his report for last year, published by the Department of Agriculture, at Ottawa, states that there was little, if any effect from the treated salt observed the first year, but the second year the ewes that had access to iodized salt had stronger lambs than the ewes which were given only plain salt. The experiment is being continued at the Fredericton Station.

Cheerful and Contented

British Columbia Is Proud Of Its Eight Centenarians

When David in his wisdom declared that "the days of our years are three score years and ten," he didn't know what British Columbia had up her sleeve to shatter that prophecy. He apparently had no inkling of the fact that in the nineteen hundred and twenty-ninth year of our Lord there would be no less than eight hale and hearty Canadians in Canada's Pacific Province chuckling over the fact that they had outspanned David and the tenth verse of his nineteenth Psalm to the tune of from one to two score years. Neither is their "strength labor and sorrow" as he predicted, for one might travel the length of the earth to find more cheerful or contented persons than these B.C. centenarians.

A Dog Stowaway

"Scoop," a "sky-terrier" pup, owned by J. A. Bernasini, Cleveland newspaperman, has the distinction of being the first dog stowaway in the country. "Scoop" was secreted aboard a plane entered in the Ohio Good Will Air Tour.

There are about 800 islands in Scotland.

From 25 to 33 miles an hour is the average speed of most small birds.

Three-quarters of the land area of Finland is forest.

URBAN F. DITMAN, JR., WITH HIS TINY NB-3 BARLING

The photograph here shows Urban F. Diteman, Jr., cattleman and amateur flier of Billings, Mont., standing beside his tiny NB-3 Barling, single-motored monoplane, "Golden Hind," in which he took off from Harbor Grace, Newfoundland, on attempted flight across Atlantic ocean to London on Oct. 22. No word has been heard from him since, and all hope for his safety has been abandoned.—Copyright, 1929, Pacific and Atlantic Photos, Inc.

The Ownerless Dog a Menace

Outbreaks Of Rabies Frequently Traced To Useless Mongrels

Rabies, which results from a person or animal being bitten by a dog suffering from hydrophobia, has, for the past few years from time to time, been breaking out in the Provinces of Ontario and Quebec. According to the report of the Veterinary Director-General, for the past fiscal year a considerable number of cases have occurred, affecting dogs, cattle, sheep and cats.

The Health of Animals Branch, of the Department of Agriculture, co-operates with Municipal Councils in enforcing measures calculated to bring the trouble under control. It is the view of the Veterinary Director-General that the dissemination of rabies frequently traces to ownerless and homeless dogs which accumulate especially in cities and towns. Untagged dogs regarding which there is no record on the assessor's sheets are regarded as a real menace, when an outbreak of rabies occurs. The first evidence of this disease in a district has been proved, is not infrequently traced to useless mongrels without license or tag, and whose owners cannot be determined.

In his report for last year which is issued by the Department of Agriculture, at Ottawa, Dr. Geo. Hillon, Veterinary Director-General, calls upon local authorities to maintain the necessary control of dogs by strictly enforcing by-laws providing for a suitably high obligatory license tax with a system of tagging by which a dog can be recognized on sight as being in good standing before the law. All dogs so tagged should be considered as having no owner and should be suitably disposed of.

Want Canadian Paper

Inquiries Coming From Import Houses In Hong-Kong

Several import houses in Hong-Kong have recently approached the Trade Commissioner's office with reference to the possibility of establishing agency or buying connections with Canadian paper manufacturers, writes Mr. Paul Sykes, Canadian Trade Commissioner in Hong-Kong, in the forthcoming issue of the Commercial Intelligence Journal. Most of these firms have had considerable experience in the paper trade, and are now interested in Canadian business on account of the favorable quality and price of these products. On account of the volume of trade in newspapers and kraft wrappings, more requests have been received for these types than for others, but bond and writings, waxed and other special wrapping papers have also been specified.

Canada's Master Clocks

Clocks At Dominion Observatory, Ottawa, Are Kept In An Underground Vault

The master clocks at the Dominion Observatory, Ottawa, kept in the underground clock vault, are maintained as nearly as possible at a constant temperature. Kerosene-mercury and toluene-mercury thermostats are designed to turn the heat on or off for a change of one hundredth of a degree in room temperature and to work for long periods without inspection. Two ordinary carbon lamps keep the room temperature at slightly under 76 degrees Fahrenheit, while two other lamps turned on intermittently by the thermostats hold the temperature practically steady at 78 degrees.

Indian Chiefs Make History

When Chief Oscanonto (Deer), of the famous Iroquois, met in all amity Chief Bimbatow Wahwahskache (Running Deer), of the Ojibways, at the Indian Reserve at Caughnawaga, near Montreal recently, history was made, since there is no record in Indian lore of these two tribes having met before. They did not understand a word of their respective languages and used English as a common medium. Chief Oscanonto intoned "Saygum" (welcome) to the deep "Boujouneepce" (greetings, my friend) of Chief Wahwahskache. The latter is better known to hunters and fishermen all over the continent as Paul Cameron, head Indian guide and mentor of tourist and sportsmen at the Nipigon Camp in northern Ontario for the past thirty years. The former is Louis Deer, chief of the Caughnawaga Indian Reserve.

Late Blight and Rot Of Potatoes

Loss From Late Blight May Be Reduced By Spraying At Proper Seasons

The average yield per acre of potatoes in Canada is regarded by authorities as approximately half of what it should be. While this deficiency is due to several causes in the opinion of P. B. Hurst, plant pathologist of the Department of Agriculture, late blight is often an important factor, both because of the premature destruction of the tops during the growing stage, and the rotting of the tubers later on.

Mr. Hurst, who has made a very careful study of potato diseases has prepared a bulletin "Late Blight and Rot of Potatoes," numbered 119, of the Department of Agriculture, at Ottawa. It has been proved conclusively that the loss from late blight may be greatly reduced by spraying at proper seasons with the proper mixture. In Prince Edward Island the neglect of spraying reduced the yield to the extent of 130 1/2 bushels per acre during a five year period of investigation. The losses due to this disease in the United States during the period of years 1918 to 1921 is believed to amount to 75,000,000 bushels of potatoes. It is given as an equally striking fact that, in regions where the disease is common, its control resulted in increased yields aggregating from 40 to 233 bushels per acre.

The organisms of the disease of late blight and rot are believed by some investigators to live over in the soil and draw sustenance from decaying tubers of plants. Others hold the view that diseased sets contaminate the soil in which they are planted, the fungus later attacking the growing sprouts and ultimately producing infection of the plant.

It is high time that this assumption be subjected to examination and tests. This important Michigan study is most emphatic evidence of the injustice that may be done, and it is to be hoped that the study of accident data will be extended in order that we may have all possible light on the problem of the middle-aged worker.—Winnipeg Tribune.

Age and Efficiency

Assumption That Forty-Five Should Be Dead Line Is Proved Erroneous

Recent investigations of labor conditions with a view to ascertaining the relation of age to efficiency have led to some interesting results.

Under present economic conditions, the age of 45 has become a deadline of hope to a great proportion of the working population. There is, perhaps, some basis for the widely prevalent opinion that younger workers are more efficient, but until the last few years no scientific investigation of the problem had been undertaken, and the position taken by employment managers rested entirely upon assumption.

The Michigan department of labor and industry has issued a study of accident frequency for various ages. The report finds that the personal injury frequency for workers aged from 20 to 24 years is 39 per cent. greater than the rate for persons between 44 to 65 years of age, and 22 per cent. greater than for those of between 25 and 44 years.

These facts are most significant, in view of the prevailing impression that the older worker is a special accident hazard for his employer. This impression of older workers has been one of the factors that make it hard for them to hold jobs or get new employment.

It is high time that this assumption be subjected to examination and tests. This important Michigan study is most emphatic evidence of the injustice that may be done, and it is to be hoped that the study of accident data will be extended in order that we may have all possible light on the problem of the middle-aged worker.—Winnipeg Tribune.

Wonders Of The Deep

Marine Biologist Finding Wonderful Creatures In Ocean

How science has taken possession of a tropical island and secured many queer prisoners for "third degree" examination, is told in a fascinating series of photographs contributed to the "Illustrated London News" by Dr. William Beebe, the well-known marine biologist. Dr. Beebe and his staff selected as their base "a speck of land" off the Bermudas known as Noonan Island. Until some time in October they "invaded with net and camera the private haunts of many weird and wonderful aquatic creatures, some of them dwelling far down in the dark abysses of the ocean." Among them is a jet-black whaler which carries a brilliant torch projecting from its forehead—this being caught at a depth of 800 fathoms.

England's Oldest House

Built In Year 740 It Has Never Been Unoccupied

An Elizabethan House seems to us to be of respectable age, but I hear of a house now to be sold, that was mentioned in Domesday Book, and at the time of that record was much older than one of Elizabeth's day would be to the present age, writes "Looker-On" in the London Daily Chronicle. The habitation in question, Minster Abbey, was built in 740, and the owner might fairly claim that he lives in the oldest house in England. For nearly 800 years it has been occupied by the Benedictine Order, either of monks or nuns, and for the last three centuries it has been a private residence. But at no period in its long history has it been unoccupied.

Woman Lifeboat Expert

Miss Lily Anderson of Liverpool, England, has just passed the Board of Trades lifeboat efficiency examination and has been presented a certificate entitling her to take charge of a lifeboat in cases of emergency. Her examination included lowering and managing these craft. She is stewardess on an ocean liner.

The world's greatest water wheel, generating 70,000 horsepower, went into action, recently, at Niagara Falls.

Mother: "Daughter, dear, I'm afraid that young man is a bad egg."

Daughter: "He's all that, and even worse."

Mother: "What do you mean?"

Daughter: "He's a bad egg that's broke."

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the cigarette girl, but he does not know that. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend, taking the child. Molly consents to a last farewell between Al and Junior before she sails for France. After this takes place at a park entrance, Al walks towards the center of the city, completely broken by his tragedy. He plans to leave the Broadway night life and disappear. The lights of evening flick the sky.

CHAPTER XXI.

But, in order to live, Al knew he must create a new life for himself. The old life was closed. He felt himself entirely alien to night clubs and the whole Broadway life; if he wrote a song it would be so tragic and filled with pain that no song-publisher or revue producer would want it. No, there was nothing for him to do but disappear from the old haunts.

In a few days, when he had pulled himself together, he would see Cline and collect on his share of the ownership of the Club Bombo. Then—goodbye!

He had reached the end of the park, at 56th Street. How the city roared; the night life was beginning, the life of which he had been a living part only a short time ago. He glanced at his watch—almost six o'clock. They were ordering all the visitors ashore from the Ile de France; in a few moments the gang-plank would be lifted and the great floating hotel of a liner would pull slowly from the dock.

Days passed; and Broadway saw no more of Al Stone. Where had he gone? His friends asked Billy Cline, his former business partner, but Billy could only shake his head sadly and say he didn't know. Marcus wanted Al to write some new numbers for a revue he had in rehearsal, but there was no Al to be found.

"What do you think's become of him?" asked Marcus of another songwriter.

"The river?" suggested the composer.

"No," Marcus shook his head vigorously. "I don't think Al would take his own life. He loves his boy too much. He'll live for that boy—you'll see. He may slip terribly, but hope for his boy will keep him going some where, somehow. We can't tell—he may be perfectly all right; he may have gone on a world cruise to forget, or he may have gone to the western country for a while."

So the conjectures passed from mouth to mouth, up and down the White Way. But Al was still in New York, living in a cheap hotel, wearing shabby clothes, his money in the bank, forgotten. He was a shadow of his former self. He walked the streets by day and night, occasionally turning in to sleep. But always he stayed away from the fashionable streets and the Broadway section. He avoided a terrible dread that he might meet some of his friends and he kept a constant, furtive lookout for familiar figures. If he saw one, he quickly crossed the street, turned the corner and disappeared.

He was still searching desperately for a plan whereby he could rebuild his life on some new basis. But that could not be done, because he kept some of his friends and he kept a constant, furtive lookout for familiar figures. If he saw one, he quickly crossed the street, turned the corner and disappeared.

Then came the day when he happened to glance across the street and saw a face he knew. Surely that was Grace, who used to be a cigarette girl at Blackie Joe's place near the Village. As she stared intently at him Al dodged rapidly round the nearest corner.

Grace's eyes followed Al in astonishment as he hurried around the corner and disappeared. At her first glimpse of him she had not been sure of his identity; it was a year since she had seen him and during that year he had almost become a different person in appearance. His little, self-confident walk was gone, his

clothes were old and nondescript, his face was thinner and the cheerful kindly glow in his eyes had vanished.

Nevertheless the man who stared at her in sudden recognition for a moment was Al—she was sure of it. She walked back to the corner and followed the direction he had taken. But either Al moved faster than she or he had darted up an alley, for she saw no sign of him. Thoughtfully she retraced her steps, her mood and expression sobered by the tragic implications of the sight she had just witnessed. So that was Al, breezy, wise-cracking, generous Al—the man who had been the hero of her girlhood three years ago, the man she had loved so devotedly! That was the youthful singing waiter whose rapid rise to fame had been one of the romances of Broadway and whose disappearance into obscurity had been one of the mysteries of the Street of Lights.

Grace had followed Al's career with the keenest attention from the fateful time when he left Blackie's night club until recently. She knew every story of his triumphs, every version of his disastrous marriage, as they were gossiped about in cabaret circles, uptown and down, and as they appeared in newspapers and theatrical weeklies. For a year after Al left Blackie's her love for him had remained, first a throbbing recollection within her, then a faint murmur from the past.

But after he ceased to visit Blackie's and became so definitely a figure belonging to Broadway, this spirit of love became like the last note of an echo—it seemed to pass away lightly. Before that he had been a part of her life, afterward he was just a graceful and vague figure who had once stirred her as no man had been able to do since that time.

Grace had staid on at Blackie Joe's. She had no scintillating talent to carry her to the peaks of Broadway success; she could not sing and dance professionally. She possessed a lovely and delicate beauty, unswerving loyalty, keen intuition, plain common-sense and a frank, unspooled nature. These qualities, while they were lacking for the most part in life, may not win fame for the persons who possess them.

Grace was obscure, but still she had scored her little successes. After Al was swallowed up by Broadway, Blackie Joe, himself, had kept a kindly eye on her and saw she was protected from the riff-raff among his customers. Soon he had promoted her from the job of cigarette girl and raised her salary. Now she was his assistant manager; she kept track of his accounts and checked the waiters when they carried food and drink to the customers.

Blackie had felt terribly sorry for Grace after Al went off to marry Molly—she was the only living person, with the exception of Grace, herself, who had any conception of the deep love the former cigarette girl and for Al. Blackie often asked himself—Why on earth wasn't Al able to see that? When Blackie's read of Molly's desertion he nodded sadly.

Now, as Grace pursued her way, a flood of memories swept across his mind—Al as he used to look in his waiter's clothes, Al as he had sung his first love ballad—"Always"—to Molly on the floor of Blackie's club, Al as she had once seen him at an uptown night club, resplendent in fine clothes, Al as she had seen his picture in the papers with Molly and his baby Junior.

Grace still recalled how the news of Junior's arrival had sent a stabbing throb through her heart that she did not understand. Then came an intense longing to see the baby that Al fathered. But that too was a faint memory—now.

It was afternoon and Grace was not due at Blackie's until evening. However, she wanted to tell the night club owner her news, so she changed her course and mounted the familiar, shabby steps. The main room was dark and deserted, but Blackie was in his office. He glanced up as Grace entered.

(To Be Continued.)

Centres Of Lumbering

The Ottawa Valley became the most important centre of commercial activity in the lumber industry of Canada with the beginning of the trade in rafting its square timber to Quebec for export. The Georgian Bay and Rainy River districts were later opened up and although the industry is now established over the entire Dominion, these districts are still among the chief lumbering regions in Eastern Canada.

Australia, New Zealand and Argentina are the greatest wool-producing centres.

Too many characters are left around loose.

Wins Asquith Cup

Miss Miller, a New Canadian Is Awarded Coveted Trophy

Miss Miller, 19, a new Canadian, is this year's winner of the silver challenge cup presented to the pupils of Asquith school by the late Earl of Oxford and Asquith. The trophy is awarded annually to the most prominent pupil.

Miss Miller, now attending Saskatchewan Normal School, came to Canada from Russia in 1924, and was then unable to speak English. From August, 1925, to June, 1926, she attended public school in Saskatoon, and covered the work of grades 1 to 8 inclusive. In 1926 she moved to Asquith, and took her high school work in the next three years.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In The House

Those mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donald Houdin, "Newick, Que., writes:—I have never but praise for Baby's Own Tablets. They are the only medicine I have ever given my little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

True Friendship Is Rare

But Few People Make Any Effort To Retain It

We should never let a friend go out of our lives, if we can by any possibility help it. If misunderstanding arises, let them be quickly set right. Friendship is a too rare and sacred treasure to be thrown away lightly. And yet many people are not careful to retain friends. Some lose them through inattention, failing to maintain those little amenities, courtesies, kindnesses which cost so little and yet are hooks of steel to grapple and hold our friends.

Death by boiling was a favorite method of execution in the time of Henry VIII.

Stop falling hair with Minard's Lintment.

There are about 9,000 cells in a square foot of honeycomb.

The man who does right because it is right is all right.

John Bull a Poor Advertiser

Discovered That Great German Flying Boat Fitted With Engines Of British Design

When the great German flying boat sailed over Lake Constance the other day with the record human load of 100 persons, the world of aviation properly hailed it for what it appeared to be—a new triumph in the air for Germany. But all the story was not told at once. Germany may not claim all the triumph. The great craft is fitted with twelve engines, 523 horsepower each, of the British Jupiter design, made in German workshops under British license.

Little, if anything, appears to have been said about these engines until an aviation critic in Great Britain came out with the warning that the fight in question "throws Britain further behind in civil aviation and makes Germany the leader of commercial flight, throughout Europe." Then the truth was told. As a Canadian correspondent in London wrote: "The commercial British mentality which finds Britain backward in thousands of ways and foreign countries much more go-ahead has received a rude shock from the discovery about these engines." Once again John Bull has shown himself to be a poor advertiser.—Victoria Daily Times.

Send Mail By Rockets

Claimed That In Short Time Mail Will Be Carried By Rocket From Berlin To New York

It is confidently asserted by the German Professor Oberth, that in a short time mail will be sent by rocket from Berlin to New York by a single propulsion. This means that letters thus sent will arrive in New York about a half hour later. The matter is taken so seriously that the American ambassador to Germany was prompted to say: "I must call attention to the fact that our government will insist that fact and property be not endangered by the rocket landing. I cannot say what guarantees would be required, but if Professor Oberth asks permission to shoot a rocket to America the state department must be informed." As the American ambassador, Mr. Schurman, is a man of broad intelligence, it may be assumed that his acceptance of the possibility of such a feat is not ridiculous.

Rockets are, seemingly, the newest toys and instruments of a scientific age which prefers to leave nothing to the imagination. Rocketeers will soon be joining racketeers to disturb our peace and to turn the incredible into the commonplace.

Asthma Brings Misery, but Dr. J. D. Kollogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the deepest recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Sets Production Record

This is an age of records—and the apricot tree in the lot of R. L. Charles wishes to keep up with the spirit of the times. So it set out this spring with a record in mind. The single tree, according to Charles, bore 200 pounds of the fruit, of which the average size was two inches in diameter.

The Scotch are such good golfers because they realize the fewer times they hit the ball the longer it will last.

Your Child's Cold Needs this Double Treatment

CHILDREN hate to be "dosed." When rubbed on, Vicks relieves colds 2 ways at once without "dosing": (1) Its healing vapors, released by the body heat, are inhaled direct to the air passages; (2) "It draws out" the soreness like an old-fashioned poultice.

Little Helps For This Week

"Thou wilt keep him in perfect peace, whose mind is stayed on Thee; because he trusteth in Thee."—Isaiah xxvi. 3.

Oh, this is blessing, this is rest! Into Thine arms, O Lord I flee; I hide me in Thy faithful breast, And pour out all my soul to Thee. O tenderness! O truth divine! Lord, I am altogether Thine. I have bowed down—I need not flee, Peace, peace is mine in trusting Thee. —Anna Laetitia Waring.

Place your whole trust in the Lord; let Him alone be your fear and your love. He Himself will answer for you, and will do what is best for you. Here you have "No continuing city," and wherever you are you are a stranger and a pilgrim; nor will you ever find rest until you are inwardly united to Christ.—Thomas A. Kempis.

Desired To Come To Canada

The Scottish edition of the London Express says: "A young Scotsman, who booked her passage to Canada at Wood Green, paid her fare of £19 10s. in half-crowns, having saved one half-crown a week for three years."

Persian Balm creates and preserves lovely and youthful complexions. Tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Swiftly absorbed by the tissues, making the skin wonderfully soft-textured. Unrivalled as an aid to feminine elegance. Delightful to use. Imparts additional charm to the delicate of women. Persian Balm is the one toilet requisite for the exacting woman. Peerless as a beautifier.

Critic: "The picture of the horse is good, but where's the wagon?" Artist: "Oh, the horse will draw that."

A Chinese professor claims to have found a man, Li Yfing, who is 252 years old. What a Li, professor!

Planes arriving at or departing from the Chicago district have 29 landing fields from which to choose.

CONSTIPATION RELIEVED QUICKLY

This Purge Vegetable will move the bowels without any pain and without depressing after-effects. Sick Headaches, Indigestion, Bilelessness and Bad Complexion quickly relieved. Children and Adults can easily swallow Dr. Carter's tiny, sugar coated pills. They are free from calomel and poisonous drugs. All Druggists 25c and 75c red pkgs. **CARTER'S LITTLE PILLS**

Needless Pain!

The man who wouldn't drive his motorcar half a mile when it's out of order, will often drive his brain all day with a head that's throbbing.

Such punishment isn't very good for one's nerves! It's unwise, and it's unnecessary. For a tablet or two of Aspirin will relieve a headache every time. So, remember this accepted antidote for pain, and spare yourself a lot of needless suffering. Read the proven directions and you'll discover many valuable uses for these tablets. For headaches; to check colds. To ease a sore throat and reduce the infection. For relieving neuritis, neuralgia, rheumatic pain.

It is not. Some folks still wonder if it really does relieve pain. That's settled! For millions of men and women have found it does. To cure the cause of any pain you must consult your doctor; but you may always turn to Aspirin for immediate relief.

People used to wonder if Aspirin might be harmful. The doctors answered that question years ago.

LOCAL ITEMS

E. J. Anderson, B.Sc., eyesight specialist, will be in Chinook on Friday, November 22.

Miss Ida Marcy, who is attending the Normal School at Calgary, spent the week end and Thanksgiving at the home of her parents, Mr. and Mrs. N. F. Marcy.

Gordon Begon, son of Mr. and Mrs. P. Begon, was suddenly taken ill with appendicitis on Friday, and was rushed to the Cereal hospital, where he was operated on by Dr. Esler. He is reported getting along fine.

On Saturday night we had the first snow storm of the season, there being about six inches on the level, but from all appearances it did not come to stay, as it is melting rapidly. A few of the farmers are using sleighs. The land will be benefitted some.

E. A. Jacobson, of Heathdale, was a Calgary visitor for a few days, returning on Friday morning's train. Before leaving Chinook for home he dropped into The Advance office and paid his subscription a year in advance. He says he must have the local news.

Mrs. Rideout, Mrs. Jacques and Mrs. Vanhook were joint hostesses to a surprise shower given in honor of Mrs. Oscar Nelson's baby. A dainty basket was decorated by the ladies to contain the many beautiful gifts which were given by the guests. A dainty lunch was served.

The barn of L. E. Butts was destroyed by fire on November 4, the result of his housekeeper's six-year-old son, Mack Wilson, playing with matches and setting fire to a large hay stack close to the building. It was with great difficulty that the other buildings were saved as a high wind was blowing at the time. The loss was heavy, as harness and other things went up in smoke as well as the winter's supply of hay and feed. Mr. Butts lives nine miles north of town.

LOCAL NEWS

Harry Lloyd spent a few days of last week in Saskatoon.

Born to Mr. and Mrs. P. Begon, on Monday, November 4, a son.

Miss Ina Rennie gave a very fine party to a number of her friends one evening last week.

Misses Sharpe and Vice entertained the Chummy Club on Wednesday evening, November 6.

Mr. and Mrs. L. S. Dawson entertained a few friends to a Thanksgiving dinner on Monday.

Miss Irene Marcy, teacher at Reaverville, spent the week end and Thanksgiving at the home of her parents.

Milton Dowker, of Cappon, purchased a new Ford light delivery this week from the local agency, Cooley Bros.

Mr. and Mrs. Chas. Ross, of Queenstown, visited at the home of the latter's aunt, Mrs. Jas. Rennie, over the week end.

Jas. McDonald, of Lacombe, arrived on Friday and spent the Thanksgiving holidays a guest of the J. G. Connell family.

Born to Mr. and Mrs. Oxley, of Innisfail, on Saturday, November 2, a daughter. Mr. and Mrs. Oxley formerly resided here.

The big social event of the season will be held in the school hall on the evening of Friday, November 22, when the Chinook Curling Club gives their grand ball.

Wes. Seegar arrived on Saturday from Calgary to visit his sister, Mrs. H. W. Butts, and former friends. He recently disposed of his barber business in Calgary and is now a free lance.

The dance in the Acadia Cafe on Saturday evening was a success. The attendance was not large, but satisfactory to the management, as it was the opening night. The dancers enjoyed themselves immensely.

Isadore DeMan, of Calgary, arrived on Saturday to visit former friends in the district. He and his family were pioneers of this community. He was accompanied by his daughter, Mrs. Carl A. Rand, of Portland, Ore. Mr. DeMan is now in the oil game and is doing well. He is connected with the Oak Finance Corporation.

LOCAL NEWS

Mrs. A. V. Youell spent last week visiting friends in Calgary.

See "Wild Geese" on Saturday night, November 16. It is wonderful picture.

Miss Elma Jones, of Standard, spent the week end at the Jas. Rennie home.

Mrs. Chismau, of Cereal, visited at the home of Mrs. C. W. Barton on Wednesday.

Wm. Sutherland, charged with being accessory to a crime, had his preliminary hearing in Youngstown on Friday, and was bound over to stand trial before a supreme court judge.

Mr. and Mrs. W. S. Lee, accompanied by Mrs. Lee's mother, Mrs. Marsh, motored to Kindersley, Sask., on Friday, spending Thanksgiving at the home of Mrs. Lee's sister, Mrs. Rutley.

Collholme Happenings

Elmer and Walter Spreeman spent a few days last week at the home of Mr. and Mrs. N. D. Morrison.

N. D. MacKinnon and family, with John D. MacKinnon, spent Thanksgiving at the home of Mr. and Mrs. N. D. Morrison.

John Duncan, of Collholme, made the first catch of the season in this district of "Prairie Reynard", a coyote in his trap.

The annual missionary Thanksgiving program was held in the Collholme Nazarene Church on Sunday, November 10. There was a good attendance considering the weather. An offering of \$34.10 was taken.

Mrs. Walter Anderson, of Heathdale, entertained the Prairie Rock Club and also a number of neighbors, making about 25 ladies present, Thursday afternoon of last week. The hostess served a dainty lunch and all had a most enjoyable time.
